

Credit Industry Insights Q2 2026

About the TransUnion Credit Industry Insights Report

TransUnion Canada’s quarterly Credit Industry Insights Report provides in-depth, statistical information drawn from its national consumer credit database (of more than 30 million files profiling nearly every credit-active consumer in Canada). It summarizes data and trends for the national population overall, as well as breakdowns within consumer credit score risk tiers, and provides insights on the Canadian consumer lending industry. By leveraging the Industry Insights Report, institutions across industries can analyze market dynamics throughout an entire business cycle, helping understand consumer behaviour over time. It provides account-level and consumer-level views of key metrics and trends – over the nine most recent quarters – and considers major consumer lending categories: credit cards, personal loans, auto loans, home loans, and lines of credit while also looking at aggregate views of all revolving lines of credit and non-revolving loans.

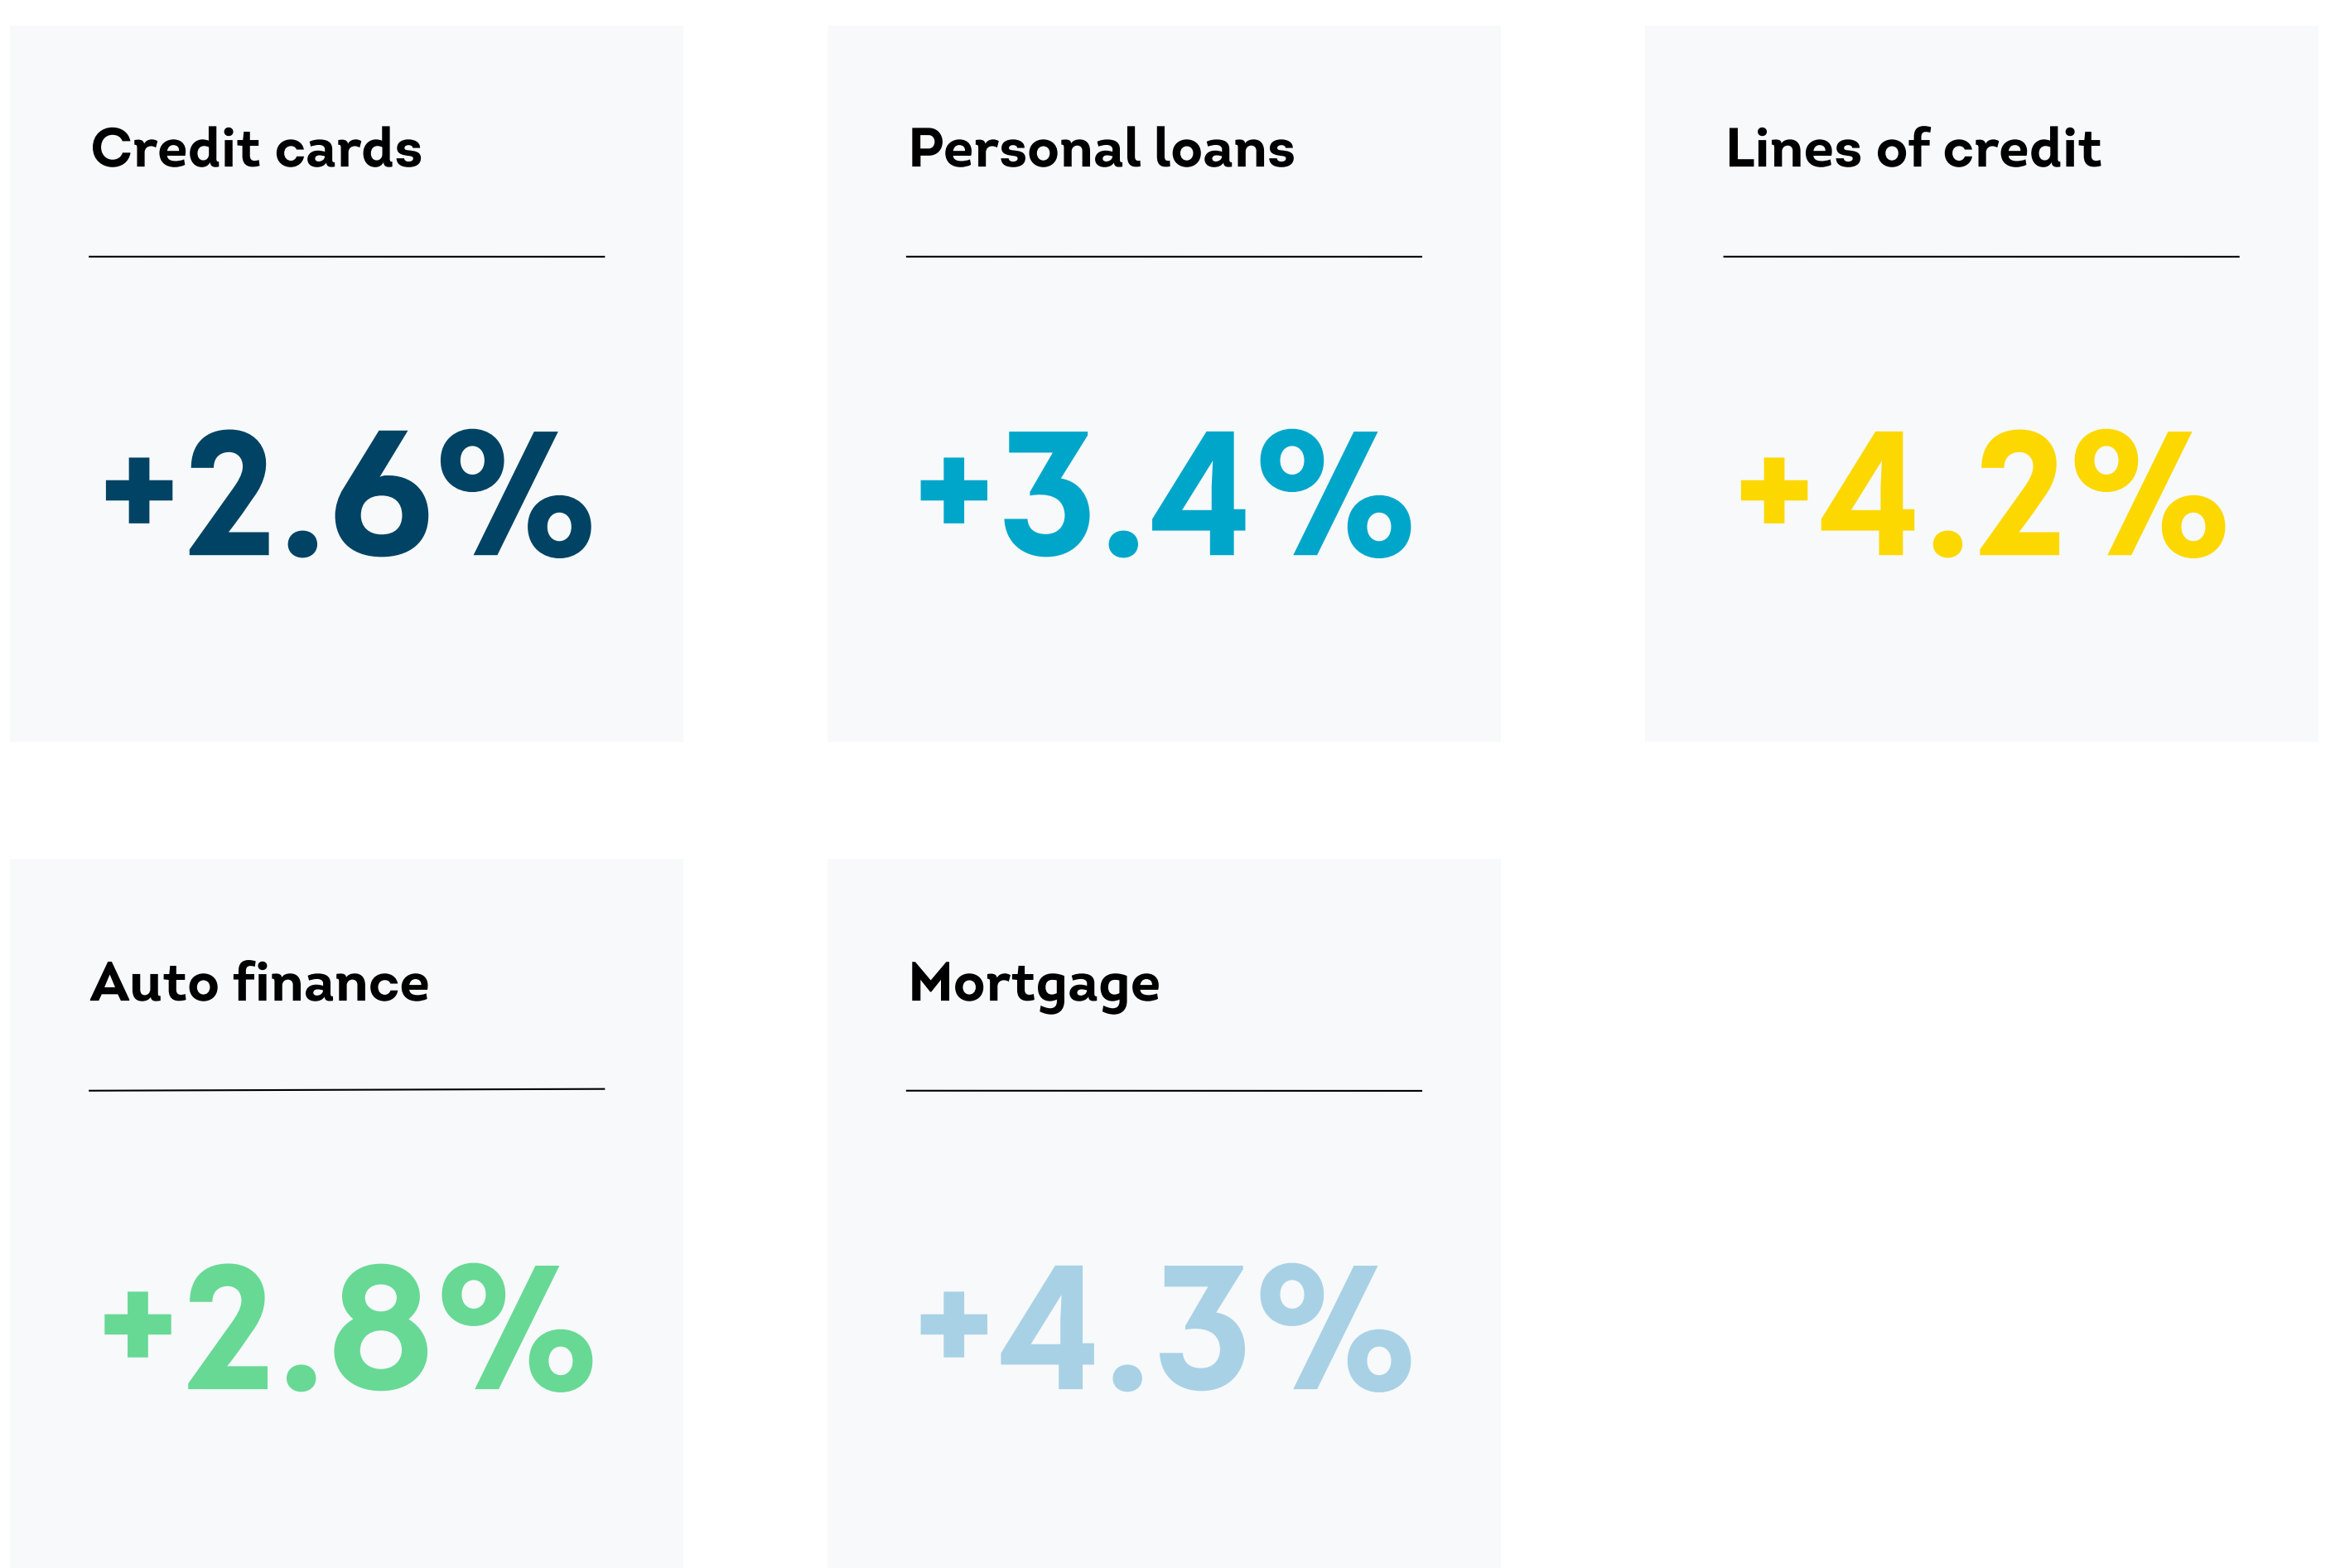

YoY Change in Originations¹

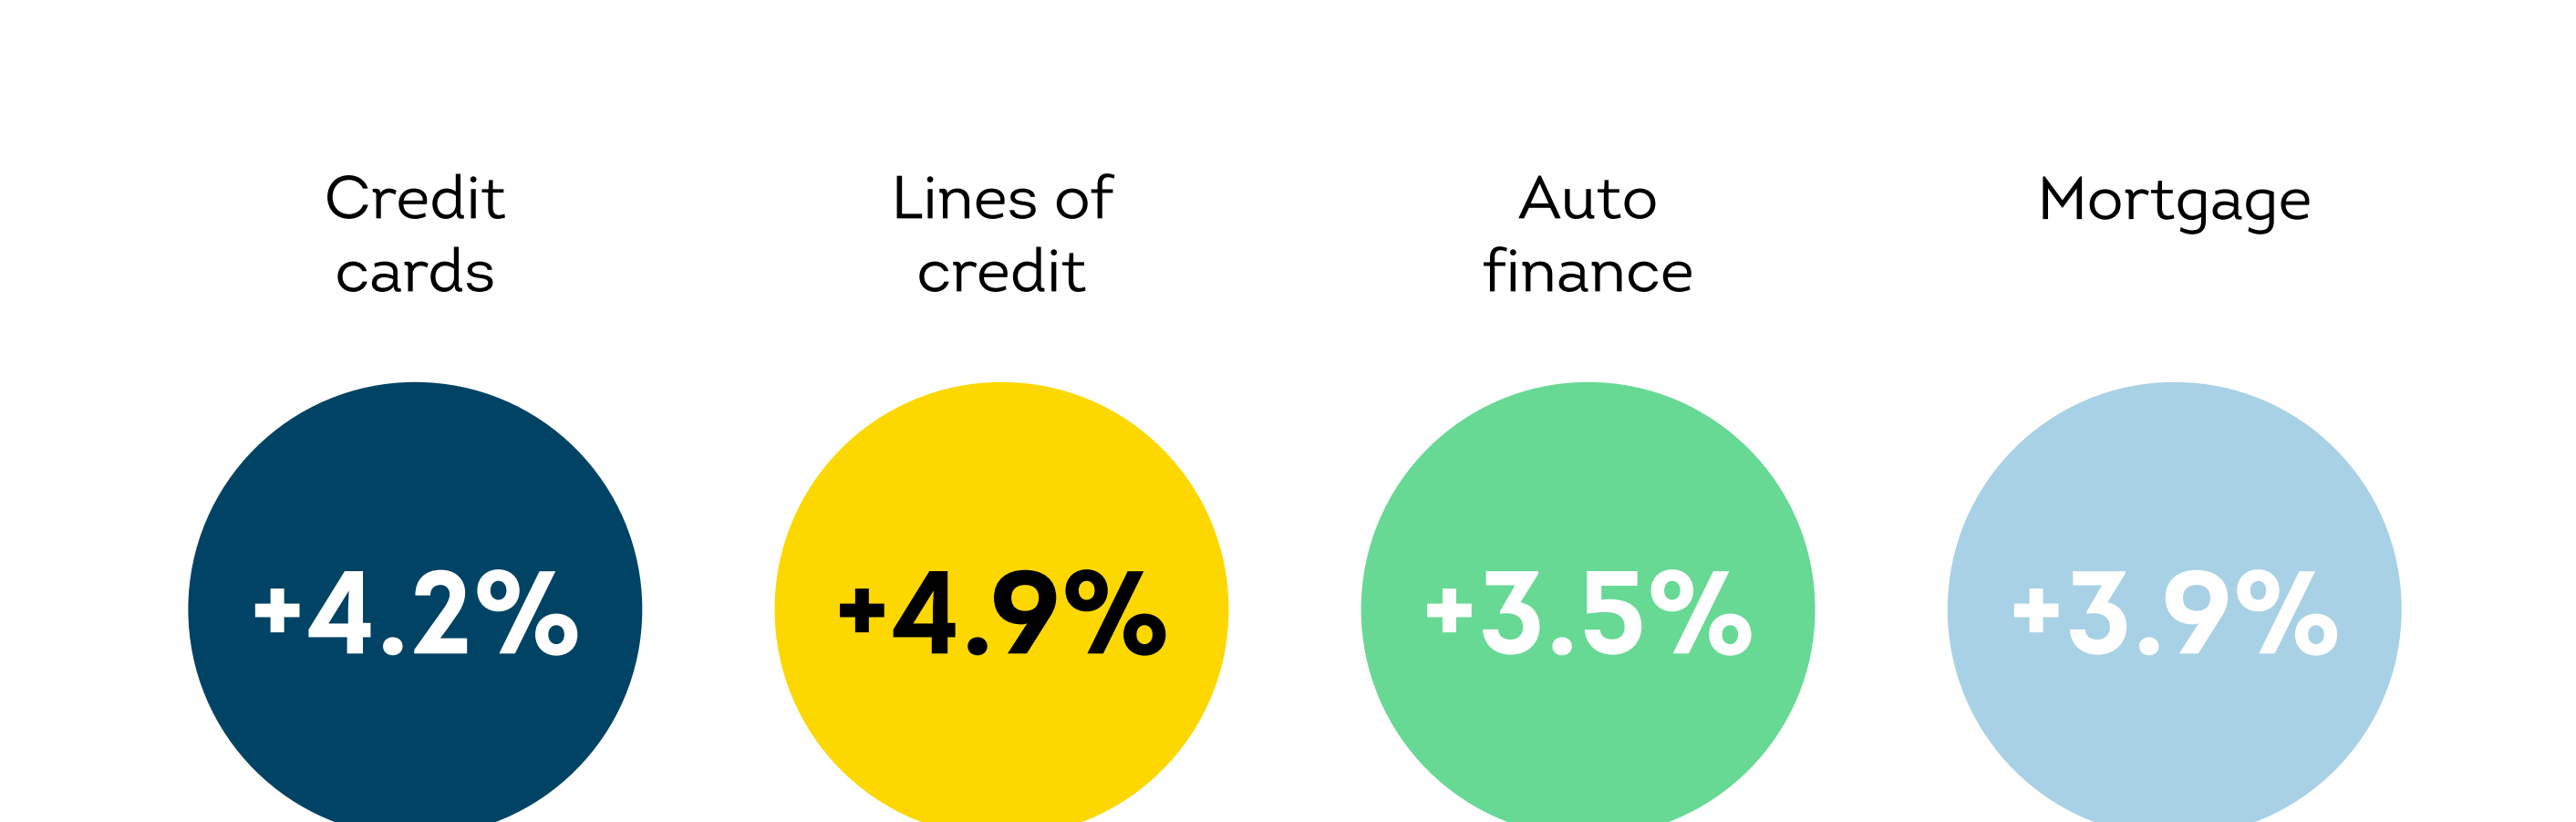

YoY Change in Serious Delinquency Rates²

Credit cards	2 bps	↑
Personal loans	42 bps	↑
