

TransUnion Bureau Verification Service and Enhanced Bureau Verification Service

Help detect and prevent fraud by comparing demographic information to our customer database

Use Bureau Verification Service to compare the personal information provided by a customer or prospect with the corresponding information contained in the TransUnion database, which contains more than 27 million consumer credit files. Choose Enhanced Bureau Verification Service for additional insight and security.

Make more informed decisions with Bureau Verification Service

Flags are returned indicating which data elements do or do not match the credit bureau file and whether the information is current. You decide what constitutes a match based on your business strategies. The information provided gives you the opportunity to take appropriate action—for example, calling consumers to request additional information or directing them to a branch to provide identification in person.

Flexible to support your organization's needs

Bureau Verification Service gives you several options:

- Available for on-line and batch applications
- May be used via the secure TransUnion Direct website
- Customization available to tighten or loosen match criteria

Enhanced Bureau Verification Service can help you check even more thoroughly. See the other side for details.

For even more confidence, choose Enhanced Bureau Verification Service

As well as all the benefits you get with Bureau Verification Service, our Enhanced solution is also available via the credit file.

Enhanced Bureau Verification Service returns additional key information:

- An overall pass/fail flag based on your rules
- The on-file data if it does not match your inquiry
- Whether the credit file has the appropriate length of history as per Canadian Regulatory requirements

Achieve more with TransUnion

As a global leader in credit information and information management services, TransUnion creates economic and competitive advantages for businesses and consumers. This powerful combination of information and insight will help you make better decisions, improve efficiency and identify opportunities at every stage of your customer lifecycle—from acquiring customers to strengthening and expanding your relationships with them.
